[C3.2-1] B: Soil Erosion and Degradation on Agriculture Land

The Soil Erosion Risk Map of the Sicilian Region (1:250,000 Scale)

Maria Fantappie¹, Simone Priori¹ and Edoardo Costantini^{2*}

¹ *Agrobiology and Pedology Research Center, Consiglio per la Ricerca e la sperimentazione in Agricoltura, Italy*

² *CRA-ABP, Consiglio per la ricerca e la sperimentazione in agricoltura, Italy*

edoardo.costantini@entecra.it

Assessing the risk areas of soil erosion by water at the regional level is relevant for current and future land planning of environmental actions to combat land degradation. The gravity of the risk is not only depending on the rate of soil erosion by water, but also on other factors, primarily soil depth and rock weatherability. The map of the soil erosion risk in the Sicilian region, expressed in terms of years to a complete loss of the fertile soil cover, is here presented as a methodological model. The degree of risk was not only estimated in function of the rate of soil erosion by water, but also of the depth of the fertile part of the profile, and of the weatherability degree of the underlying bedrock.

Keywords : Risk assessment, soil thematic strategy, geomorphology, geology, soil formation rate, Sicily

20th WORLD CONGRESS OF SOIL SCIENCE

In Commemoration of the
90th Anniversary of the IUSS

O R A L S E S S I O N

- Congress Symposium

- June 9 (Mon)

- June 10 (Tue)

- June 12 (Thu)

- June 13 (Fri)

- For your reference, abstracts of oral sessions are shown as group per symposium, but those of poster presentations are listed individually.

- Those who wish to cite abstracts in the proceedings of 20WCSS may refer as below since the abstract online access system does not specify the page.

* Author's Name. 2014. Title of Abstract. Symposium Name. Proceedings of the 20th WCSS (www.20wcscs.org), Abstract Online Access System, June 8 to 13, Jeju, Korea.

(Example) Kim, S.Y. and V.K. Choi. 2014. Soil security and awareness. Congress Symposium 1: Soils for Peace. Proceedings of the 20th WCSS (www.20wcscs.org), Abstract Online Access System, June 8 to 13, Jeju, Korea.

O57-3
14:30 **Comparing Different Approaches - Data Mining, Geostatistic, and Deterministic Pedology - to Assess the Frequency of WRB Reference Soil Groups in the Italian Soil Regions**
Romina Lorenzetti^{*}, Roberto Barbetti, Maria Fantappie', Giovanni L'abate and Edoardo A.c. Costantini
Consiglio per la ricerca e la sperimentazione in agricoltura, Italy
